Summary

Aspiring researcher eager to apply my broad knowledge of the latest technologies, specialized skills in project and quality management, and passion for creating a sustainable future. With a background in engineering and economics, I am ready to address complex challenges. Particularly interested in researching how companies can measure their sustainability performance and create systems to profit from making the world a better place.

Work experience

PhD Candidate / NTNU / Trondheim / Jan 24 - Present

- Work as a PhD candidate at Department of Mechanical and Industrial Engineering, studying how companies can measure their sustainability performance and integrate it into their performance management

Summer Scientist / SINTEF / Trondheim / Jun 22 - Aug 23

- Worked two summers with the research group Industrial Economy and Optimization at SINTEF Industri
- Actively contributed to two projects focused on macroeconomic analysis for policy guidance, with responsibility for conducting scenario defining and developing sustainability indicators
- Collaborated with a highly competent research group, gaining valuable experience and insights from working alongside industry experts

Student Representative / NTNU / Trondheim / Jan 22 - Dec 22

- Represented the students in key committees and leadership groups at the department level
- On my own initiative, I conducted presentations to educate staff on the student democracy at NTNU

Gym Receptionist / Sit / Trondheim / Jan 21 - Jun 24

- Greet members, sell memberships, manage phone calls and schedule appointments

Process Operator / Elkem ASA / Orkanger / Jun 19 - Aug 19

- As part of a team of three, I was responsible for the transport of electrode mass and rods to two silicon melting furnaces

Sales Host / Trondheim Kino AS / Trondheim / Sep 18 - Nov 20

- Operated the cinema store, checked tickets and maintained movie theaters

Factory Worker / Con-Form AS / Orkanger / Jun 16 - Aug 18

- Worked here at three consecutive summers and took part in the whole process of producing precast concrete elements used in construction

Volunteer positions

Leader of Charity Committee / A/F Smørekoppen / Jan 22 - Jan 23

- Led a committee of 16 students that successfully planned and executed an auction collecting over 100 000NOK for charity, a new record at the faculty
- Was responsible for planning and tracking progress, as well as stakeholder management

Coach of Football Team / A/F Smørekoppen / Aug 20 - Jun 22

- Developed communication and mentoring skills as a coach for the student women's football team at my program
- Utilized the positive effects from creating unity and a team spirit

Education

Master of Science

NTNU / Trondheim / Jun 2024

- M.Sc in mechanical engineering with specialization in project and quality management
- Master's thesis assessed Norwegian companies' relationships with measuring indicators from the European Sustainability Reporting Standards
- Led an 11-member team in the subject TMM4121 - Engineering Design, gaining hands-on experience in project planning and coordination

Bachelor of Economics

NTNU / Trondheim / Jun 2024

- Alongside my M.Sc I have been taking extra subjects to achieve a bachelor of economics
- Includes topics like micro and macro analysis, as well as finance, international trade and econometrics
