Hans Solli-Sæther is a professor of strategy at the Department of International Business, Norwegian University of Science and Technology. As the head of the Department of International Business (2017-2023), he served as a member of several university-wide expert committees, the editorial board of the university newspaper, and the advisory board for research projects and other programs. He has been serving as a guest professor at ESDES Business School in Lyon, France, since 2018, and was engaged as a visiting professor for the HumanTech project at Politecnico di Milano, Italy, from April to July 2024.

Solli-Sæther has conducted research in the areas of multinational enterprises, mergers and acquisitions, global value chains, and management of information systems. His work has been published in journals such as MIS Quarterly, Global Strategy Journal, Journal of Purchasing and Supply Management, and the International Journal of Technology Management. He has also conducted research related to innovation in public sector; for example, the Semicolon project, which investigated interoperability in public sector 2007-2013, was funded by RCN.

Solli-Sæther has generated research grants, sponsored funds, and endowments from Norwegian companies such as Accenture, Kongsberg Maritime, Sparebanken Møre, the Research Council of Norway (RCN), Regional Research Fund, and others.

He teaches international business strategy, international organization and management, global sourcing and supply network management, and digitalization of value creation. He has also taught in executive education programs for the Norwegian industry and public sector.

Solli-Sæther holds a BSc in mathematics, statistics, and computer science from University of Oslo, a MSc in software engineering from University of Oslo, and a Ph.D. in organization and leadership from BI Norwegian Business School.

He has work experience from industry as a software engineer, management consultant, and executive leader, serving as Chief Information Officer at Norway Post.
