

Curriculum vitae – Torbjørn Svendsen

Key qualifications:

Research and teaching experience in machine learning and artificial intelligence for over 40 years, specifically in speech technology. Speech recognition and synthesis are areas which require multidisciplinary collaboration, both with regards to applications and to the development of systems and methods, and we have engaged in such collaborations since 1990.

I have extensive project management experience through a series of research projects, and have also administrative experience as Department Head and Faculty Vice Dean. I have also a number of appointments on the national level, e.g. as chair of the program board of the VERDIKT ICT research program in the Research Council of Norway.

I have been full professor at NTNU since 1995. In the period 2015-2021 I was also Director of NTNU Digital, which is NTNU's strategic initiative for research and application of digital technologies. In that capacity I was heavily involved with the establishment of the Norwegian Open AI Lab (NAIL). I was also involved in the planning and programming of the Code of Ethics workshop in 2019, addressing ethical issues of digitalization and AI.

I have a long-standing and extensive international engagement, including research visits at leading institutions such as AT&T Bell Labs, AT&T Shannon Labs and MIT. I have been Vice President of the International Speech Communication Association (ISCA), the world's largest organization for researchers in spoken language processing.

I have >100 peer reviewed publications, mainly on various aspects of speech technology. I have been the supervisor of 19 PhD graduates and ~100 Master's degree students.
